PROFESSIONAL SUMMARY

MES Engineer and Pharmaceutical Manufacturing Systems Specialist with **20+ years' experience** in **FDA and HPRA regulated environments**. Deep expertise in **POMSnet Aquila MES, Electronic Batch Records (EBR)**, recipe and worksheet development, MES validation, Computer System Validation (CSV), change control, CAPA, and **cGMP compliance**. Lead MES SME for the POMSnet Aquila implementation at Abbott Diagnostics Longford. Abbott DVP Award recipient for MES Implementation Excellence, 2024. Experienced delivering across Manufacturing, Quality Assurance, Validation, Engineering and IT functions.

KEY ACHIEVEMENTS

- ▶ **Lead MES SME** for Abbott Diagnostics Longford POMSnet Aquila implementation — full lifecycle delivery from design through deployment and validation.
- ▶ **Abbott DVP Award Winner** — MES Implementation Excellence, 2024.
- ▶ 20+ years' continuous experience supporting FDA and HPRA regulated pharmaceutical manufacturing operations.
- ▶ Authored, tested and deployed MES recipes and worksheets supporting Electronic Batch Record execution in regulated environments.
- ▶ Supported successful deployment of validated MES recipes and Electronic Batch Records across Immunoassay and Clinical Chemistry manufacturing operations.

Higher Certificate in Science & GMP

Atlantic Technological University,
2012

Abbott DVP Award — MES
Excellence, 2024

APM Project Management
Qualification

Lean Six Sigma Yellow Belt

Intermediate SQL Certification

Intermediate Git Certification

PROFESSIONAL EXPERIENCE

Independent Software Development Project

Jul 2025 – Present

CryptaVitae

- Designed and developed a secure record management application applying pharmaceutical-grade auditability, traceability and data integrity principles.
- Managed full SDLC from requirements and architecture through testing; implemented audit trails and controlled documentation reporting.

Process Specialist

Sep 2024 – Jul 2025

Abbott Diagnostics, Sligo

- Supported HIV laboratory data analysis and operational intelligence within a GMP-regulated environment.
- Developed Excel automation and Python scripting solutions; supported cross-functional project coordination within regulated documentation frameworks.

MES Subject Matter Expert / Process Specialist – POMSnet Aquila

Feb 2022 – Aug 2024

Abbott Diagnostics, Longford

Abbott DVP Award — MES Implementation Excellence 2024

- **Lead MES SME** for POMSnet Aquila implementation — authored, configured, tested and maintained MES recipes and worksheets throughout the full project lifecycle.
- Delivered and validated **Electronic Batch Records (EBR)** in accordance with GMP, FDA and HPRA regulatory requirements.
- Managed validation documentation (IQ, OQ, PQ) supporting **Computer System Validation (CSV)** activities to regulatory standard.
- Executed **SAP and POMSnet system change control**; participated in CAPA, risk assessments and audit readiness preparation.
- Developed and maintained SOPs and training plans; provided technical training and ongoing support to manufacturing personnel.
- Operated as cross-functional MES lead across Quality Assurance, Validation, Manufacturing, Engineering and IT.

Solution Preparation Laboratory Specialist

Feb 2004 – Jan 2022

Abbott Diagnostics, Sligo

- Managed laboratory manufacturing processes for large-scale diagnostic reagent production across an 18-year tenure, maintaining cGMP compliance throughout.
- Maintained batch documentation, inventory tracking and calibration control; trained cross-functional staff in process safety, GMP and quality adherence.
